Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

D. VAN NOSTRAND,

Publisher of Scientific, Military, and Naval Books,

23 MURRAY AND 27 WARREN STREETS, New York.

Our Stock comprises a Large and Complete List of Works pertaining to

ARCHITECTURE, ASTRONOMY, NAVIGATION, BREWING, DISTILLING, CHEMISTRY, PHYSICS, CIVIL AND MECHANICAL ENGINEERING, ELECTRICITY, GEOLOGY, HYDRAULICS, SANITARY ENGINEERING, MATHEMATICS, AND WORKS OF REFERENCE, &c.

☞ *Catalogues of the above will be sent to any address upon application.* ☜

VAN NOSTRAND'S

ENGINEERING MAGAZINE,

COMMENCED JANUARY, 1869.

Published on the 15th of the month at $5.00 per year.

The current year is the twelfth of the existence of this MAGAZINE. Beginning as an Eclectic Journal, and presenting almost exclusively matter selected from current literature, it has gradually become the chief medium through which the leading writers on engineering subjects can best present their original essays to American readers.

The present attitude of the MAGAZINE is that of a journal of original and selected papers upon subjects relating to modern advanced Engineering. Theoretical and practical Essays are alike presented in its pages, although the latter largely out-number the former, as best suited to the tastes and demands of the American Engineers. Some of the most valuable contributions to the literature of technical science within the last few years have been first presented in these pages.

Among the more extended original contributions to the later volumes may be cited new contributions to Graphical Statics — Transmission of Power by Wire Ropes — Maximum Stresses in Framed Bridges — Momentum and Vis Viva — Rapid Methods of Laying out Gearing — Transmission of Power by Compressed Air — Geographical Surveying — Mathematical Theory of Fluid Motion — Thermodynamics — Practical Theory of Voussoir Arches — Cable Making for Suspension Bridges.

To the above may be added the following valuable essays, translated from foreign sources, which have first appeared in these pages: Linkages and their Applications — The Origin of Metallurgy — and the Theory of Ice Machines.

The plans for the present volume comprehend further improvements in the same direction. The wants of the educated practical engineer, who desires to keep in the foremost rank of his profession, will be steadily kept in view, and our constantly increasing resources for supplying the best of scientific information will be employed to secure such results.

☞ Cloth covers for Volumes I. to XXI. inclusive, elegantly stamped in gilt, will be furnished by the publisher for fifty cents each.

If the back numbers be sent, the volumes will be bound neatly in black cloth and lettered, for seventy-five cents each. The expense of carriage must be borne by the subscriber.

Notice to New Subscribers. — Persons commencing their subscriptions with the Twenty-second Volume (January, 1880), and who are desirous of possessing the work from its commencement, will be supplied with Volumes I. to XXI. inclusive, neatly bound in cloth, for ***$55.00.*** In half morocco, ***$85.00.***

Notice to Clubs. — An extra copy will be supplied, gratis, to every Club of five subscribers, at ***$5.00*** each, sent in one remittance.

CONTENTS.

PAGE

Regular Figures in n-dimensional Space. By W. I. STRINGHAM, *Fellow of the Johns Hopkins University* 1

On the Algebra of Logic. By C. S. PEIRCE 15

On Certain Ternary Cubic-form Equations. By J. J. SYLVESTER 58

On the General Equations of Electro-magnetic Action with Application to a New Theory of Magnetic attractions, and to the Theory of the magnetic Rotation of the Plane of Polarization of Light. By HENRY A. ROWLAND, *Professor of Physics in the Johns Hopkins University* 89

The subscription price of the Journal is $5.00 a volume; single numbers may be obtained at $1.50. Remittances from countries included in the Postal Union may be made by *international* money order.

Communications and subscriptions (by postal money order) should be addressed to

WILLIAM E. STORY,
Johns Hopkins University,
BALTIMORE, MD.
